

GOLDISLE LIGHT ORG

*Global Procurement Execution Framework
Sourcing from China under UK Governance (B2B)*

1. Purpose and Scope

This document defines the operational framework by which GOLDISLE LIGHT ORG supports **global buyers sourcing from China** through structured procurement execution, production-side coordination, and risk-managed settlement. The framework is designed for business-to-business (B2B) transactions and reflects UK-based governance and execution standards.

2. Core Positioning

GOLDISLE LIGHT ORG operates as a **global procurement execution and risk mediation entity**. The organisation does not engage in profit-oriented commodity trading, does not purchase or resell goods, and does not take ownership of physical products at any stage. Its function is to enable international buyers to procure from Chinese manufacturers while reducing execution and coordination risks.

3. Production-Side Coordination and Risk Mediation

In global procurement from China, the production side cannot be avoided. Unmanaged direct exposure to manufacturing entities often introduces execution risk. GOLDISLE LIGHT ORG proactively coordinates with manufacturers to stabilise commitments and maintain a single accountable interface on behalf of buyers.

4. Transaction Structure

International Buyer

- Confirms procurement terms
- Arranges international freight and insurance
- Handles import clearance and local compliance

Chinese Manufacturer

- Manufactures goods in accordance with agreed specifications
- Ensures export compliance and documentation
- Delivers goods under FOB Qingdao Port (Incoterms®)

GOLDISLE LIGHT ORG (UK)

- Publishes procurement terms and execution parameters
- Coordinates execution and delivery discipline
- Manages the production-side interface on behalf of buyers
- Administers settlement documentation and audit trail

5. Standard Procurement Terms

Procurement is typically structured under FOB Qingdao Port (Incoterms®), with lead times, quantities, and pricing defined per project. International freight and insurance are arranged by the Buyer or the Buyer's nominated forwarder.

6. Settlement Methods

Payments are accepted solely for **procurement execution and settlement services**. Accepted settlement instruments include PayPal (Business Invoice) and, where appropriate, cryptocurrency settlement as a cross-border settlement instrument. No retail sales or consumer transactions are conducted.

7. Disclaimer
